

BERT'S SHEET METAL PRODUCTS QF-001 · CALIBRATION REGISTER

Controlled form under Quality Manual QM-001, Section 12 (Calibration) · Rev A · August 13, 2026

List every measuring or test instrument used to verify or accept product. Assign each a tool ID (mark it on the tool). Standard interval is 12 months unless noted. An instrument past its due date, damaged, or found out of tolerance is removed from service until recalibrated — note it in Status.

Tool ID	Description	Mfr / Model	Serial No.	Interval	Last Cal	Due Date	Cal By (lab / in-house)	Cert No.	Status
BSMP-01	Caliper, digital 6"			12 mo					
BSMP-02	Caliper, digital 12"			12 mo					
BSMP-03	Micrometer 0–1"			12 mo					
BSMP-04	Height gauge			12 mo					
BSMP-05	Pin gauge set			12 mo					
BSMP-06	Thread gauge set			12 mo					
BSMP-07	Protractor / angle gauge			12 mo					
BSMP-08	Steel rule / tape (reference)			12 mo					
BSMP-09	Scale (counting / shipping)			12 mo

Calibration certificates from the outside laboratory must state traceability to N.I.S.T. File certificates with this register (attach digital copies to the vendor record in the shop system). Status codes: OK · DUE (past due, out of service) · OOT (found out of tolerance — review product accepted since last good cal) · REF (reference only, not used for acceptance).
